Rome prosecutor RG 21245/2016 - Prosecutor of Perugia RG 4071/2017

To the attention of:

Dott. Giuseppe Pignatone Chief Prosecutor Prosecutor of Rome Dr. Gemma Miliani , Deputy Prosecutor of the Prosecutor of Perugia Republic

Dear Dr. Pignatone,

I write in relation to proceedings **21245/2016** that saw myself, with her sister **Francesca (American citizen)** condemned, in first instance, to the penis notes. The performance of the defensive investigations, searches performed on public sources and active collaboration with the Anglo-Saxon investigators on the topic, have led to the discovery of worrying elements of connection between the investigation EyePyramid, against the accused Occhionero, and the investigation Russiagate , On the then US presidential candidate Donald Trump, Today President Trump.

A further cause for concern is, then, the fact that such elements of connection between the two investigations clearly aspects of investing national security . However, there seems to have been given representation of this, nor to parliamentary bodies, nor to the supervisory bodies with subsequent submission of information to the Parliament.

The findings of such research has, therefore, led the undersigned to report any abuse and to inform not only the competent public prosecutor's offices in Italy, but also supervisors, survey and control of the American administration. In this context, for example, I am sure not It may have escaped her demand that ' **Chief Inspector Paul Primiani, under the Postal Police (CNAIPIC)** He did to my friend

Maurizio Mazzella the morning of January 9, 2017, the day of our arrest. Primiani, one of the first questions that addressed Mazzella during the search, he asked: "Who is your contact in the Trump campaign?".

Because, as you well remember, at that date the candidate Trump He was already the de facto President in pectore Trump , It is not understandable why there **Rome prosecutor** same investigating in this direction. Everything appears in clear relationship with the famous story of the stolen emails to Hillary Clinton nominated; email maybe someone had feared could be found on the Occhionero server. — —

Always my renewed signaling in this sense also goes on conduct which is seriously omission held by Dott. Albamontes during the process, which has never produced the contents of that letter rogatory just our server. And 'quite clear that, even before that because of reasons extremely sensitive above, such a failure to produce constitutes the umpteenth violation or a serious injury defense . It is not clear, then, the ultimate reason

a similar *secrecy*, except by virtue of a *need omission*, aimed at maintaining *someone* free from one or more responsibilities. Therefore, with this, I renew the call for integral production of all the inherent material the rogatory and of *any and all* correspondence between members of the **Prosecutor of Rome**, of the **Police post** he was born in **CNAIPIC** on the one hand, and **Department of Justice** and **FBI** on the other; in relation to our method and the related matters

Russiagate.

Similarly, I urge you to make available to our defense any other act of investigation that has been, until now, illicitly made unavailable to the same including, but not limited to: surveillance, eavesdropping, photo shoots and more.

I am sure that, approaching the date on which will yield the conduct of your office, you'll want to ensure to all of us and to himself , That no shadow can stand out on the public prosecutor of Rome, in a matter of such delicacy.

Yours faithfully, Giulio
Occhionero
